

ValueD™

Value insights.
Informed decisions.

Valuations are typically complex. ValueD can bring clarity to the valuation process and can offer insights for informed strategic business decisions.

ValueD is a powerful new platform designed to **change the client experience**. The platform leverages artificial intelligence (ai), market-based benchmarks, and Deloitte's vast industry experience to cut through complexity and provide deeper insights through real-time dynamic visualizations that our clients can use to make informed decisions.

Valuation insights to power decision-making

With ValueD's interactive functionality, data visualization, and dashboards, you can generate insightful valuation analyses to tell "your story" by allowing you to drill down into valuation and business assumptions and underlying data sources.

Enhanced quality

Leverages AI and cognitive technologies coupled with our experience to enhance quality and reliability.

Business insights

Provides benchmarking and insights based on a variety of research and proprietary databases to provide insights that enable informed business decisions.

Dynamic modeling

Offers the ability to dynamically perform multivariable sensitivity analysis and evaluate alternative scenarios on-demand.

Data analysis

Click-through experience provides an improved understanding of sources and calculations enabling you to uncover and convey true value.

Engagement management

Provides enhanced visibility of project status, enables real-time tracking of data requests, and facilitates response to data requests.

The ValueD advantage

Real-time scenario and sensitivity capabilities can enable impactful assumptions and inputs.

Generate insights

- **Benchmarking:** Access insights based on Deloitte's proprietary valuation database and objective research sources such as S&P Capital IQ®, EIU, and MergerStat.*
- **Risk assessment:** Toggle to alternate views based on historical trends, industry estimates, and analyst consensus estimates to identify risk areas and/or confirm specific inputs/scenarios.
- **Dashboard views:** Tell your story with easy-to-use dashboards—where you can drill down to supporting analyses and sources with just a few clicks.

Dynamic modeling

- **Real-time, multivariable sensitivities:** Effectively perform real-time multivariable sensitivity analyses and planning, assess the impact of select assumptions, and run what-if scenarios.
- **Artificial intelligence (AI) for enhanced quality:** Tap into cognitive technologies that perform hundreds of quality checks and highlights inputs or assumptions that may require closer review.
- **Powerful data-handling capabilities:** Efficiently handle large volumes of data and value complex global businesses—up to 5,000 entities.

Enhanced experience

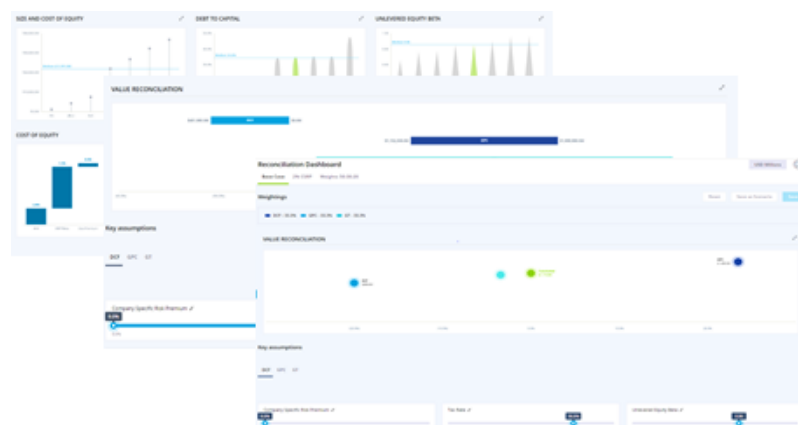

- **Valuation-specific project management:** Access on-demand valuation health, milestone tracking, and status of data requests.
- **Secure, real-time access:** Retrieve—as needed—securely from a cloud-based platform.
- **Reporting on-demand:** Easily tailor materials to facilitate discussions with your various stakeholders.

*S&P Capital IQ® is a registered trademark of S&P; EIU is a service of Bureau van Dijk, a Moody's Analytics Company; and MergerStat is a FactSet Mergerstat publication of Business Valuation Resources.

Value insights. Informed decisions.

As a full-service professional services organization with deep industry intelligence, Deloitte works with clients to assist them in taking a broad-based approach to their valuation analyses.

With ValueD, we can help you develop quicker and deeper insights and provide you with access to dynamic tools for informed business decisions.
